TACTICAL LINE

From the experience in climbing and rescue, updating since two centuries, here is a complete military line for intervention in any place and situation. Produced with the highest standard quality combined with the most advanced methods of research, KONG items make easier all the operations in which quickness and precision are essential and grant safety and reliability in hostile surroundings.

Since 1830 KONG is producing quality equipment for your safety.

Helmet visor resistant to surface damage caused by fine particles and mist. Made of high-quality polycarbonate of Japanese origin.

Extremely robust, it protects from:

- high-speed projection (120 m/s) of particles at room temperature (class B)
- ultraviolet radiation (smoked version only 997.056.F)

The included mounting kit can easily be assembled with Mouse, Spin and Leef helmets thanks to the pre-marked holes in the shell.

Available in transparent and smoked version.

Conform to CE EN 166.

KIT TARGET PRO AERO

The TARGET PRO AERO KIT has been conceived and designed to safely suspend and secure helicopter rescuers during helicopter rescue operations, both inside the aircraft and during winch phases. The kit consists of a harness combined with a life jacket, with the life vest ensuring buoyancy in case of emergency. The life jacket is activated by means of a special self-inflating command through a CO2 cylinder.

JACKET AERO

The Jacket Aero is made of NOMEX® fabric with NOMEX® breathable mesh. The orange borders are made of PU-coated nylon.

A variety of pockets necessary for storing survival and/or operational material can be attached to the Jacket.

Equipped with a pair of removable slings for attaching the Jacket to the harness.

Weight approximately 1,3 kg, buoyancy 200N (20 liters)

TARGET PRO AERO

Rescue and helirescue harness, conceived for those situations where lightness and freedom of movement are essential.

Equipped with automatic buckles on the chest and leg loops for ultra-fast dressing.

All buckles are made of stainless steel AISI 316 to ensure maximum resistance in corrosive and marine environments.

The wide padding on the leg loops guarantees greater comfort during suspension.

The kit is available in 4 sizes: S, M/L, XL, XXL.

UNI SIZE HARNESS | FOR MILITARY, LAW ENFORCEMENT AND THE ENTERTAINMENT INDUSTRY

Minimalist harness for military, law enforcement and the entertainment industry.

- Certified to EN12277:2015+A1:2018 Type C and tested to UIAA 105.
- Consists of a ventral bridge attachment with 45x63mm span and 16mm protection.
- Waistband with 44mm high tenacity polyester webbing.
- Tapered leg loops with 44mm high tenacity polyester webbing.
- Equipped with 3 automatic buckles on the waist and leg loops that allow full opening for quick donning.
- Colored safety indicator on automatic buckles for visual verification of proper closure.
- Uni size and widely adjustable.
- Thanks to the continuous webbing, the size is adaptable for both adults and children.
- Equipped with NFC chip that allows unique digital identification of the product, in order to simplify the control and the inspection.
- Made in Italy!

HARNESS FOR RESCUE DOGS

Haria is a harness for rescue, working and police dogs, specially designed for suspension in rough terrain and helicopter activities.

The one size is adjustable by means of innovative buckles that can be opened and easily maneuvered. It adapts to fit the dog breeds used in this canine world with weights up to 50 kg.

The suspension point is clearly visible even in the dark thanks to the reflective tape, it is identified by a special pictogram. When not in use, it can be stored under the specific elastic retaining strap.

On the back there is a comfortable handle for handling the dog. The GPS pocket # 844080N01KK (optional) can also be positioned here.

For ground operations without suspension requirements, using the front part on its own is allowed. For all suspension operations on impassable terrain and/or with a helicopter, the combined use of the front and back part is required. Both parts can be easily connected/disconnected via the automatic buckle.

The GPS pocket was positioned to minimize the possibility of it getting caught in vegetation or rubble. The Velcro closure is to eliminate the possibility of classic zip failures.

Integrated NFC chip with the option of entering personal, dog and/or operator data.

High-visibility color helps you to identify the dog in all scenarios; also available in black.

High quality product, completely designed and made in Italy!

HARNESSES

ASSAULT HARNESS 320USN

Yates Tactical lightweight assault harness. Well suited for all rescue, military, SWAT and tactical applications where a Class II harness is utilized. Black webbing with terra contrasting thread.

Quick-adjust waist and leg buckle system for easier entry.

D ring used for the main attachment point.

Weight 680g (1 lb. 8 oz.)

- One size
- Quick leg adjustment with *camlock* buckles
- One gear loop
- Meets ASTM/ANSI/OSHA Seat harness standards
- Meets New NSN Rappel Harness Construction criteria
- USN Version UL Classified to meet NFPA 1983/2017 edition standards.

This device is not suitable for private use, and it is specifically designed for use by the armed forces or in the maintenance of law and order.

HARNESSES

SPECIAL FORCES RAPPEL BELT 319C

Unique new concept for a CQB (Close Quarters Battle) belt system that can easily be converted to a rappel or extraction seat harness. Belt portion of the harness can be worn as a standard CQB belt. The waist belt buckle is located on the left of the center to make it easier to accommodate a drop leg or waist holster on the right side of the waist belt. The leg support portion of the harness is easily attached to the belt with *Cobra Quick Connect* buckles. The leg portion is small enough to be stowed in BDU (Battle Dress Uniform) leg pockets. The harness attachment point is well suited for all rappel and extraction situations.

Waist belt portion is now made with "operational camouflage pattern" (OCP) webbing.

Quick release *Cobra* waist buckle.

Sizes available: M, L, XL

Colour available: OCP/terra.

Meets ASTM F1772 Seat Harness Standards

This device is not suitable for private use, and it is specifically designed for use by the armed forces or in the maintenance of law and order.

HARNESSES

SPECIAL OPS HARNESS 309

New *Yates Tactical* harness that utilizes a fully padded structural duty belt which is designed to replace the existing padded duty belt worn by SWAT Officers. Super stiff scuba webbing is sewn to the outside of the belt to facilitate hanging of leg holsters, ammo pouches and gas mask bags. Scuba webbing belt attached to inside structural webbing by velcro for easy adjustment and positioning of holsters and pouches. The scuba webbing attachment system is now able to be separated at the rear of the waist belt to easily accommodate slide on holsters and pouches. Velcro and hard pull snaps secure the outer belt portion in position. *Cobra Quick Connect* Waist Buckle is now configured to allow the user to have the buckle on the left side or right side of the belt so that it will not interfere with the positioning of the side weapon depending if the user is right or left-handed. Gear loops can now be adjusted to any position along the belt. The leg loop portion of harness can be quickly attached to the belt with a standard locking carabiner (not included). This converts the duty belt portion of the system into a fully functional rappel harness.

Quick leg adjustment with *camlock* buckles

Meets ASTM/ANSI/OSHA Seat harness standards

Meets ASTM F1772 Seat Harness Standards

5 sizes available: S (68-81cm / 27-32"), M (76-89cm / 30-35"), L (86-99 cm / 34-39"), XL (96-106cm / 38-42")

DESCENDERS

INDY EVO PLUS

Evolution of the well-known Indy Evo descender, fitted with a new lever, easier to handle, that allows more fluid and precise working.

Indy Evo Plus is a manually operated descender device with double autolocking system, that locks both when the lever is released or when it is pressed. Indy Evo Plus is also a descender (conform to EN 12841 type C) for working on rope. It allows descent at a controlled speed, stopping at any time, hands free, on a static rope (EN 1891) or dynamic rope (EN 892). Light weight and compact size, long life guaranteed by the stainless steel cams and low maintenance make it a working tool very appreciated by the industry.

Certified for two people, it allows two people to lower at the same time and also allows the user to take in rope slack.

High quality product, made in Italy!

FRICTION PLATE | RIGGING PLATE

A belay plate that can be used in many different conditions.

It is a very useful device for rescue operations, the natural choice for mountain experts.

It allows a cleaner belay point, avoiding tricky and cumbersome chains of carabiners and plates.

The wide upper hole is able to accommodate two connectors for higher safety.

When used as a descending device, it works with ropes from 8 to 12mm.

Tested piece by piece.

DESCENDERS

GI-GI TACTICAL

A real workhorse for Kong!

Multipurpose hot-forged aluminum plate for use with single, double and twin ropes.

Its main applications are self-locking belaying for one or two seconds and abseiling.

The central rib acts as a fulcrum on the connector and allows the recovery of two people, even secured to ropes of different diameter, either simultaneously or separately.

In the case of a fall, only the rope subjected to the fall blocks, leaving the other free to slide.

It is possible to use the GI-GI in combination with a self-locking device and a foot pedal for emergency lifting.

DESCENDERS

OKA TACTICAL

Descender especially conceived for canyoning, designed not only for progression on rope but also for use in emergency, recovery and rescue situations which are very difficult to manage with other devices. Quick, safe and effective function in all conditions. The ease of operation, diversity of progression techniques on ropes of different diameters, and the multitude of braking positions are characteristics achieved through its joint development with rescue technicians.

Connector suggested: Large Multiuse Auto Block

Available as a set OKA + Large Multiuse Auto Block connector

Supplied with two spare rubber parts.

*The black color is particularly appreciated for all uses where the equipment must be not very visible (military use, theater and cinema, acrobatic shows, etc ...).

DESCENDERS

BIG 8 TACTICAL

Figure '8' descender with wings for create a locking knot. Perfect for belaying the first climber with double ropes.

The large central opening allows you to overcome any knots on the ropes.

It works on ropes from 9 to 16 mm

*The black color is particularly appreciated for all uses where the equipment must be not very visible (military use, theater and cinema, acrobatic shows, etc ...).

DESCENDERS

CHUY TACTICAL

The Chuy is a belay and rappel device that works on half, twin and single ropes.

Very light, the user can change the braking capacity thanks to the "V" shape notches, so as to modulate the effort of the user according to their own weight, the rope used, and all those factors that modify friction and consequently the braking.

It gives a smooth feed, strong braking and a great look.

It is recommended for use with HMS screw sleeve connectors.

*The black color is particularly appreciated for all uses where the equipment must be not very visible (military use, theater and cinema, acrobatic shows, etc ...).

ROPE CLAMPS

LIFT TACTICAL

Rope clamp for rope access, available in left and right versions. All the components are part of the latest generation of Kong blockers. Excellent ability to block out particularly on muddy and icy ropes thanks to the holes on the cam and on the side plate. The new material and a special chemical and thermal process give to the cam, in addition to black color, a much higher surface hardness. The result is a great wear resistance and a reduction of the fragility that usually penalizes steels by quenching to low temperatures. New opening lever, ergonomic, easy to handle and protected from shocks and from the risk of accidental opening.

Fitted with anti-overturning system of the cam.

Quality product, made in Italy!

*The black color is particularly appreciated for all uses where the equipment must be not very visible (military use, theater and cinema, acrobatic shows, etc ...).

ROPE CLAMPS

FUTURA HAND TACTICAL

A revolutionary rope clamp for its extremely tiny dimensions (only 125g) and ergonomic shape. Its small size allows the users hand to sit comfortably inside the device, close to the rope in the same way as you would grabbing the actual rope. Available in right and left versions. The best support to ascend a rope with the "ROPE WALKING SYSTEM" (as if climbing a ladder). After testing the system, cavers confirm an excellent performance and a 30%-efficiency's increase during the ascent.

Fitted with anti-overturning system of the cam.

High quality, made in Italy!

Patented.

MULTIUSE COMPACT ROPE CLAMP

Innovative ultra-compact emergency rope clamp.

Designed for single ropes with a diameter between 8 and 13mm, Duck also works on slings made with Vario and Aro Sling Tubular.

Very small in size, it is easy to insert even with one hand.

In addition, the large attachment hole also allows the rotation of the locking carabiners.

Duck was born as an emergency ascender useful in recovery maneuvers, self-rescue, progression in preserves and as a regulator for lanyards or webbing.

Available set consisting of Duck + OVAL ALU screw connector (# 888SET001KK)

High quality product, completely made in Italy!

BLACK VERSION

Evolution of a great classic, Lecco 2.0 is the new stretcher for mountain rescue that maintains the same versatility of the previous version with new features that make it even more versatile and efficient!

Product chosen by CNSAS - National Alpine and Speleological Rescue Corps

The main features are:

- new comfortable reinforced and hoistable carrying bag that allows ultra-fast stowage
- ready for use in less than a minute, assembled by a single operator
- pre-assembled frame and bag, with no components that can be lost
- new ergonomic handles with variable sections (oval-round) for better load distribution on the shoulders and more comfortable transport
- lateral zipper equipped with 4 sliders that allow partial opening for inspection and management of the injured person
- additional zipper at the foot
- immobilization straps made in different colors for fast operation
- transparent visor allows visual contact with the injured person to be maintained
- wide range of accessories that guarantee maximum reliability in the various conditions of use

Its length, shoulder supports included, is 3.1 meters. Without the supports it is 2 meters long. Refolded in its carrying ruck-sack, the stretcher measures 85x55x22 centimeters. The weight is 16 kg (without carriage bag).

The fabric cover has a range of webbing straps in different colors for seizing hold of the injured person at all key points. Four outer compression straps ensure the patient is safely secured. A double zipper allows the fabric cover to be completely opened for inspection, including of the lower limbs. Additional zipper at the foot. The generous cover size and compression strap lengths allow a vacuum mattress to be fitted (indispensable for immobilizing the injured person).

The front and rear shoulder supports are fitted with comfortable padding. The front shoulder supports can be inserted in a straight position for carriage on general terrain or reversed in position for extremely steep slopes or jutting drops, thus preventing the rescuer from slipping out of the shoulder supports. The length of the rear supports allow the rescuer to have good ground visibility.

BLACK VERSION

Helirescue kit composed of:

EVEREST BAG # 855.00

Rescue helicopter bag designed to be used either with rescue board either with vacuum mattress. Designed and tested with all type of lifting helicopter devices generally used.

Hanging attachment loops in different colours.

Provided with multipurpose pockets.

Manufactured with tear-proof nylon and Cordura®

Weight: kg 4

X-TRIM 2 # 855.11

Innovative foldable in two pieces spinal board made with carbon fiber, completely x-ray transparent, it can be inserted in T.A.C., Magnetic Resonance Imaging (M.R.I.) and other diagnosis apparatus, avoiding the moving of the injured.

Light weight and compact, only 4,9 kg with 5 mm thickness.

Designed and conceived for all kind of rescue intervention for operation in extreme conditions.

TAYLAN # 855.02

Webbing system for wounded fasting.

Easy to adjust and provided with a quick locking device using connectors.

Weight: kg1

PATTY # 855.03

Hanging kit made of two pieces of seven webbings, each one with different colours.

Light and compact, it supports loads till kN 4.

Weight: kg 0.5

HEAD IMMOBILIZER # 855.06

Head immobilizer fitted with chin straps

for the correct immobilization of the injured.

Fast assembling with Velcro strips.

CARRIAGE RUCKSACK # 855.28

Comfortable and compact rucksack with handles and resealable shoulder straps, easy to transport by one only rescuer or to lower with a winch.

Dimensions: height 95 cm - width 55 cm - depth 20 cm

BASKET STRETCHER WITH LIGHTENED SHELL

Basket stretcher fitted with a shell that has hexagonal holes that allow water and sand to drain out. Extremely lightweight, it can be disassembled into two parts for easy transport. Equipped with internal padding and fastening straps.

Optional removable shoulder straps #880060KITKK

Lightweight aluminum alloy frame, thermoformed HDPE (High-Density Polyethylene) protective shell, offering excellent patient protection.

Easy to clean and disinfect thanks to the removable inner padding.

Easily transportable by hand thanks to the tubular structure that runs around the perimeter, offering easy handling by multiple operators.

Suitable for helicopter transport (length just under 2m is compatible with most helicopter cabins).

Fitted with hanging kit ARIES #880070100KK

Can be divided into 2 pieces and easily loaded on the shoulders with the straps provided.

Optimized connection system between the two halves, central hinge for quick and easy connection, self-centering side pins and quick-locking screw sleeve.

Compatible with all Kong immobilization devices (X-TRIM spinal boards and Vacuum mattress).

Compatible with Flok-IT flotation system #880020300KK

The perfectly symmetrical shape allows the patient to be positioned in either orientation.

The straps are equipped with automatic buckles made of high-strength polymer material.

Rapid product identification via unique serial code and NFC chip.

- Length: 1980 mm
- Width: 600 mm
- Height: 170 mm
- Weight: 9.00 kg (excluding shoulder straps and hanging kit)

High quality product, designed and manufactured in Italy!

ROLLABLE STRETCHER | CONFINED SPACES

Rollable medical device designed for confined space rescue; particularly suitable for the evacuation of injured persons from places with tight or complicated passages.

An extremely flexible device, very useful in evacuating injured persons under complex environmental conditions.

Without rigid frames, it is easily stowed and transportable in its bag fitted with shoulder straps and side zip.

Main features:

- Increased thickness giving greater resistance to rubbing, increased patient protection and greater stability during handling.
- Easy to clean and disinfect.
- Hanging kits for vertical transportation in wells or tunnels.
- Hanging kit for horizontal winching, even by helicopter (mod. Serpens #890010100KK).
- Side handles for multi-operator transportation, with high visibility reflective indicators for quick recognition in dark areas.
- Easy maintenance with separately replaceable components.
- Quick product identification via unique serial number and NFC chip.
- Available in two colors, yellow or black.
- Head/foot orientation stickers that facilitate correct patient positioning.
- Can be used alone or in combination with a spinal board, vacuum mattress or positive pressure mattress.
- Compatible with Flok-IT flotation system #880020300KK

Available in shortened version, HALF ROLLY, which can be used alone or in combination with the ROLLY as an immobilizer for vertical transport.

FAST ROPE S.P.I.E.

Marlow®

S.P.I.E. (SPECIAL PATROL INSERTION & EXTRACTION)

Marlow's extraction system has been designed for the transportation of a larger number of personnel with increased safety.

Higher strength to accommodate greater number of personnel (10 to 12 as standard).

Two loop integrated colour coded safety system for all personnel: personal loop (green) and back-up loop (red).

One yellow loop for easy retrieval of the rope itself at the end of the helicopter operation.

Main rope material: Polyester.

Personnel loops material: UHMPE (Ultra High Modulus Polyethylene).

Spliced eye (SE) termination.

Available lengths: 27,4m and 40m.

FAST ROPE F.R.I.E.S.

Marlow®

Marlow F.R.I.E.S. (Fast Rope Insertion & Extraction Systems) are designed and developed to deploy and evacuate rapidly, reducing the risk for operators and helicopters.

Each F.R.I.E.S. can carry up to 6 fully equipped persons through its loops, and it can also be used as a standard fast rope.

Available with 3 types of terminals: dynalite (DLT), multifit (MFT) and spliced eye (SE).

The diameter of the F.R.I.E.S. is 40 mm and the length can be selected from a wide range of possibilities.

Marlow is a world leader in fast rope and F.R.I.E.S. production. Their products are used by hundreds of operators, armed forces and special teams around the world. Kong is the exclusive importer and distributor of Marlow products in Italy and the only company authorized to provide warranty and inspection on these products.

FAST ROPE S.P.I.E. WPX

Marlow®

S.P.I.E. (SPECIAL PATROL INSERTION & EXTRACTION) WPX

Marlow's floating extraction system allows easier retrieval from waterborne operations. Designed to carry 10 to 12 personnel.

Two loop integrated colour coded safety system for all personnel: personal loop (green) and back-up loop (red).

One yellow loop for easy retrieval of the rope itself at the end of the helicopter operation.

Super strong and light-weight.

The main rope has been designed for low shock loads.

Main rope material: Polyolefin

Personnel loops material: UHMPE (Ultra High Modulus Polyethylene)

Spliced eye (SE) termination.

Available lengths: 27,4m and 40m.

Marlow is a world leader in fast rope and F.R.I.E.S. production. Their products are used by hundreds of operators, armed forces and special teams around the world. Kong is the exclusive importer and distributor of Marlow products in Italy and the only company authorized to provide warranty and inspection on these products.

FAST ROPE

MARLOW FAST ROPE RACK

Marlow[®]

FAST ROPE DESCENDER

Innovators in the field of rope technology, Marlow Ropes Ltd designed and developed the original Fast Rope in conjunction with the British Special Forces. These ropes are now in use by traditional Special Forces and SWAT teams across the globe.

Marlow have now launched the Fast Rope Rack (FRR) to be used in conjunction with 40mm fast rope and to aid the rapid insertion of units. This innovative British-made device (European Union registered design no. 004389369-0001) is:

- Quick and easy to install
- Ideal for descending with multiple loads and the insertion of non-Fast Rope qualified personnel such as Medics, Interpreters, locals, Bomb Disposal specialists in addition to descending with dogs.

This set consists of: FAST ROPE RACK + LANYARD + QUICK OUT LINK ATTACHMENT

This product is available only in the following countries: Italia

FAST ROPE

FAST ROPE AND F.R.I.E.S. BAG

Marlow[®]

Marlow's Fast Rope Transportation and Deployment Bag is designed with backpack straps and a padded back section for easy one person carrying.

It comes with compression straps to secure the internal load and strong handles for manoeuvring and storage.

The bag is finished off with an external pocket for use log and an Internal clip for attachment to Marlow Fast Ropes for deployment.

Marlow is a world leader in fast rope and F.R.I.E.S. production. Their products are used by hundreds of operators, armed forces and special teams around the world. Kong is the exclusive importer and distributor of Marlow products in Italy and the only company authorized to provide warranty and inspection on these products.

FAST ROPE

FAST ROPE BAG

Marlow[®]

A practical bag specifically designed to store Fast Ropes which ensures improved storage and transport for your fast ropes.
It allows to keep Fast Ropes clean, dry and protected from UV rays.
This Fast Rope Bag will be provided with all orders of fast rope up to the measurements stated below.

Features:

- Dimensions: 112 x 40 x 30cms.
- Made from 1000 Denier PVC material, nylon webbing
- Colour: Black
- Twin zipper for easy access to the contents of the bag
- Suitable for Fast Ropes from 12.2 metres (40 Feet) to 36.6 metres (120 Feet)

FAST ROPE

FAST ROPE GLOVES

Marlow[®]

Kevlar[®] lined cowhide leather glove with a split leather palm for improved grip, durability, insulation and heat resistance when fast roping. The Neoprene and leather cuff provides a secure fit with a spandex/elastane stretch back adding comfort and flexibility.

The unique flexibility and grip characteristics allows the user greater versatility as the gloves can both be worn during Fast Roping descents and when using equipment and weapons.

Glove properties:

- Cowhide leather glove
- Split leather palm
- 4 way stretch spandex back
- Neoprene and leather cuff
- Kevlar[®] lined palm
- Adjustable velcro wrist

Marlow is a world leader in fast rope and F.R.I.E.S. production. Their products are used by hundreds of operators, armed forces and special teams around the world. FAST ROPE

TACTICAL RAPPEL/FAST ROPE GLOVES

Yates Tactical rappel/Fast Rope Gloves.

Thick full-grain leather second palm extends over the palm and to the second joint of your fingers to provide added protection from the heat and friction generated when fast roping. The index finger is separated for trigger finger dexterity. Carabiner hole in the wrist for attaching to harness. The entire glove is sewn with heat resistant KEVLAR thread.

Available in Black and Coyote Tan.

5 sizes available: (S, M, L, XL, 2XL).

This device is not suitable for private use, and it is specifically designed for use by the armed forces or in the maintenance of law and order.

MULTI-DIRECTIONAL OPENABLE RING

Multi-directional openable ring, suitable for semi-permanent equipment connection. Ensures optimal load distribution in any position.

Uniform load of 22 kN in all directions, it is tested according to the recent UIAA 130 (Load Sharing Device).

It allows more than two devices to be connected, distributing the load evenly.

[Read the standard, click here.](#)

Conforms to EN 362/M standard with a 24 kN load.

Wide 15 mm opening that allows ropes with sewn terminations to be inserted.

Removable gate by slotted screw that does not require the use of special tools, just a simple flat screwdriver.

Asymmetric shape that eliminates the chance of assembly error.

Screw equipped with a rubber seal that ensures optimal tightening without annoying vibrations.

The body has a central flattening construction with raised edges that both increases the load capacity and protects the markings.

Available in 2 sizes, with internal diameter of 42 and 48 mm.

Designed and manufactured completely in Italy!

ARGON S

ALU ALLOY | SCREW SLEEVE | ASYMMETRIC

Argon is a carabiner dedicated to people who seek extreme lightness and the slightest dimensions. Designed for better rope glide, to ensure good positioning of belay devices and shape adapted for easy tying and untying of a clove hitch. Wider rope contact surfaces for reduced wear on the carabiner. The D shape transfers the majority of the load onto the spine, the carabiner strongest axis. The asymmetric shape, furthermore, is ideal for connecting belay or rappel devices or for use at the end of a lanyard. The screw sleeve is recommended for dirty environments, where other spring-loaded sleeve may jam due to dirt.

Key features:

- Very compact shape ideal for belay station
- Low-profile for reduced bulk
- Keylock system
- Screw sleeve easy to employ one-handed
- HIGH QUALITY PRODUCT, COMPLETELY MADE IN ITALY

ALUMINUM CARABINER | AUTO BLOCK SYSTEM

Compact and lightweight carabiner, with a high tensile strength.

The particular shape makes it suitable to be handled more easily by people with small hands, like women or children.

3 movements Auto Block sleeve: to open the carabiner, lift the sleeve, rotate it, and then pull the gate.

Key Features:

- Improved opening and capabilities thanks to the bent D-shaped
- Slim profile for a small footprint
- Keylock system
- High quality product completely developed and manufactured in Italy
- Tested piece by piece

FERRATA AUTO BLOCK

ALUMINUM ALLOY | AUTO BLOCK SLEEVE | WIDE OPENING

Aluminum carabiner with 3 movements Auto Block sleeve and Keylock system. Its special shape allows a large aperture (less than 26 mm!) and excellent grip. The Auto Block sleeve makes it suitable for professional use.

Normally used on lanyards for progression and positioning.

Key Features:

- Improved opening and capabilities thanks to the D-shaped bent
- Keylock system
- High quality product completely developed and manufactured in Italy
- Tested piece by piece

ALUMINUM CARABINER | EXPRESS SLEEVE

Aluminum carabiner with Express sleeve and Keylock system. The most classic carabiner for via ferrata. Its special shape allows a large opening and a good grip. Express sleeve: to open the carabiner must lower the sleeve and then pull the gate. It is normally used mounted on a lanyard or via ferrata set.

Key Features:

- Improved opening and capabilities thanks to the D-shaped bent
- Keylock system
- High quality product completely developed and manufactured in Italy
- Tested piece by piece

ALUMINUM ALLOY | AUTOMATIC CLOSURE

With an innovative approach that characterizes KONG comes the Frog, a revolutionary directional connector with an automatic clamping action that engages when it touches the anchor point.

Produced after an intensive design phase in collaboration with Politecnico of Milan, the Frog is a totally new connector, both in its appearance and mechanism.

Frog makes the concept of a carabiner thought of as a "hook" obsolete.

The insertion is extraordinarily quick and safe, even in "distant" anchor points, not easily reached with standard connectors.

It automatically clamps when coming into contact with the anchor point.

Sling length of 120mm.

High quality, completely developed and produced in Italy.

Tested piece by piece.

Patented.

New version with a fixed pin that prevents any possibility of disassembly.

CARABINERS / CONNECTORS

FROG CABLE

ALUMINUM ALLOY | FOR METAL CABLES | AUTOMATIC CLOSURE

With an innovating approach, that characterizes KONG, comes out Frog, a revolutionary directional connector, provided with an automatic clamping that takes place touching the anchor point. Produced after a hard design in collaboration with Politecnico of Milan, Frog is a totally new connector, both in the appearance and in the mechanism.

Frog makes obsolete the concept of a carabiner thought as a "hook".

The insertion is extraordinary quick and safe, even in "far" anchor points, not easy to be reached with standard connectors.

It automatically clamps coming into contact with anchor point.

Special for anchoring on metal cables.

High quality product completely developed and produced in Italy.

Tested piece by piece.

Patented.

ALUMINUM ALLOY | SCREW SLEEVE

Aluminum carabiner light and high load, with screw sleeve and Keylock system. The D shape transfers the majority of the load on the main axis of the carabiner, which is the most resistant. The asymmetric shape is also ideal for belay systems. The screw sleeve allows to have a safer closing of the gate, and also makes it suitable for professional use. Usefull for use during bolt belay.

Key Features:

- Heavy load
- Keylock System
- High quality product completely developed and manufactured in Italy
- Tested piece by piece

ALUMINIUM CARABINER | AUTO BLOCK SYSTEM

Aluminium connector with 3 actions Auto Block sleeve and Keylock system. The classic wide pear shape makes it suitable for belay with clove hitch. Can be used with all anchoring and belaying systems. Automatic sleeve makes it suitable for professional use. Equipped with Keylock system that prevents any snagging with the rope and in the bolts. High quality product completely developed and produced in Italy. Tested piece by piece.

Usage activities

MOUNTAINEERING	CANYONING	CAVING	SCAFFOLDING AND TRESTELS
ROOF AND INCLINED PLANES	ROPE ACCESS	CONFINED SPACES	
LADDERS AND ELEVATING PLATFORMS	SAILBOATS	TREECLIMBING / ARBORICULTURE	
FIREBRIGADES AND CIVIL PROTECTION	TACTICAL

HMS NAPIK AUTO BLOCK

ALUMINIUM ALLOY | AUTO BLOCK SLEEVE | COMPACT HMS

Aluminium connector with 3 actions Auto Block sleeve and Keylock system. The classic wide pear shape makes it suitable for belay with clove hitch. Can be used with all anchoring and belaying systems. Automatic sleeve makes it suitable for professional use.

More compact and lighter than the traditional HMS and with a higher tensile strength.

Equipped with Keylock system that prevents any snagging with the rope and in the bolts.

High quality product completely developed and produced in Italy.

Tested piece by piece.

Available in version with bar.

ALUMINUM CARABINER | TWIST LOCK SYSTEM

Light alloy carabiner with wide opening. The particular D shape prevents the rotation of the carabiner and allows to distribute the load along the major axis.

Equipped with Keylock system that prevents any snagging on the rope and in the bolts.

Fitted with Twist Lock sleeve, easy to handle even wearing gloves.

2 movements: to open the carabiner turn the sleeve and pull the gate.

High quality product completely developed and produced in Italy.

Tested piece by piece.

OVAL ALU CLASSIC SCREW SLEEVE

ALUMINUM ALLOY | SCREW SLEEVE | OVAL SHAPE

Oval aluminium carabiner with a circular section which makes it recommended for use with mobile devices (pulleys, blockers, fall arresters ...).

Equipped with screw sleeve which makes it also suitable for professional applications.

Keylock system that prevents any accidental entanglement in rope or anchor point.

High quality product completely developed and produced in Italy.

Tested piece by piece.

I-OVALONE ALU AUTO BLOCK

I-CONNECTOR | CONNECTOR WITH INTEGRATED NFC CHIP

New connector equipped with NFC chip that brings the history of your device always at your fingertips. No expensive readers required. Readable with a common smartphone or PC. This solution provides an easier and faster periodic inspection process, avoiding dangerous mistakes made during the serial number transcription. Compatible with any inspection software. Patented system. Standard version, without chip, also available

Oval aluminum carabiner with large opening.

Key features:

- Autoblock sleeve (3 movements): to open the carabiner must lift the sleeve, rotate it, and then pull the lever
- System Keylock
- High quality product entirely developed and manufactured in Italy
- Tested piece by piece

Also available with the new ECO finish obtained by totally removing heavy chemical treatments. *Think green, preserve the planet!*

OVALONE ALU SCREW SLEEVE

ALU ALLOY | SCREW SLEEVE | LARGE OPENING

Oval aluminum carabiner with large opening. The wide symmetrical shape, greater than that of a classic oval, still allows a better positioning on mobile devices and their correct operation even if not perfectly aligned with the connector.

Key features:

- Screw sleeve
- System Keylock
- High quality product entirely developed and manufactured in Italy
- Tested piece by piece

Usage activities

ALUMINUM ALLOY | DOUBLE GATE | WIDE OPENING

Aluminum carabiner with double gate safety system. To open the carabiner push the rear gate with your palm while pulling the front gate with your fingers. The rear gate is protected in order to prevent accidental opening against the wall. Specifically conceived for use in via-ferrata sets and adventure parks lanyards.

Fitted with Keylock system.

High quality product, tested in Italy piece by piece.

X-LARGE ALU AUTO BLOCK

Light alloy carabiner with Auto Block sleeve. The X-Large is designed to offer a wide gate opening and a high tensile strength. The particular D shape prevents the rotation of the carabiner and allows to distribute the load along the major axis.

Equipped with Keylock system that prevents any snagging on the rope and in the bolts.

Fitted with Auto Block sleeve, easy to open even wearing gloves.

3 movements sleeve: to open the connector it is necessary to lift the sleeve, turn it and then pull the gate.

High quality product completely developed and produced in Italy.

Tested piece by piece.

EQUIPMENT BAG

Equipment bag fitted with pockets and compartments to hold your equipment in a practical and efficient way.

Once laid on the ground, it opens up completely, allowing you to easily locate material, keep it organized and ready for use.

The compact and elongated shape makes it easy to carry on the shoulders, while guaranteeing a large internal capacity.

External features:

- Made of high strength and cut resistant fabric
- Waterproof and removable PVC flap that hides and protects the shoulder straps when not in use
- External top hood pocket is easily accessible
- Can be comfortably carried using the concealable shoulder straps and padded back
- Portable by hand using the two large reinforced handles
- Can be hoisted in a vertical position using the specific loop
- Velcro closure and safety buckles prevent accidental opening
- Heavy-duty zips with additional press-stud safety closure
- ID badge pocket
- Plastic buckles for fixing the optional helmet holder accessory #982004N00KK

Internal features:

- 5 large mesh pockets with Velcro closure
- 24 attachment points for connectors
- 2 straps with adjustable buckles for fixing the rope, or the optional rope holder accessory #982003N00KK
- Transparent pocket for documents

Optional accessories:

- 19l Rope bag (holds 100m of 10.5mm diameter rope) #982003N00KK
- Helmet holder made of elastic webbing #982004N00KK

High quality product made in Italy.

Please note: equipment is not included

- Bag for carrying ropes and equipment, with concealable, comfortable padded shoulder straps and removable wide lumbar support.
- Haul loops of different lengths for barycentric suspension.
- Wide opening for convenient access to the bag's contents.
- Inner roll closure with aluminium buckle and external drawstring closure.
- Side opening equipped with an ultra-resistant size 10 nylon zip with a protective anti-rubbing flap and an automatic button that prevents accidental opening.
- Rear identification label
- Rear loop for suspension
- Transparent side pocket to hold an identification tag.
- Internal removable pocket with zipper and textile loops for storing the smallest of tools.
- Made of extremely durable PVC.
- Reinforced bottom with wear-resistant edge.
- Double seams at the points of greatest stress.
- 50L capacity which is expandable to 60L.

Optional: 5 mm thick bottom pad #982524011KK made in EPE (expanded polyethylene) with a rigid insert on the outer bottom made in polypropylene, which:

- Stiffens the bottom to guarantee the stability of the bag
- Protects the bottom from sharp objects that could damage it, such as drill bits, blades, ice axes, avalanche probes, etc.
- Can be used in emergency as a bowl of water for pets or as a container for small objects

Height 55 cm (plus extension 20cm)

Width 33 cm

Depth 25 cm

ROPE PROTECTION | CORDURA®

Very light tube made of strong Cordura® used as a protection of ropes against sharp edges. Compared to the classic PVC protection, it has a significantly higher resistance and a lower weight. The Velcro® closure allows the positioning around the rope in any point. Fitted with a plastic ring to fix it avoiding slippage. Available in two colors for immediate identification in case of simultaneous use of two ropes.

System used for a precise positioning during rescue operations: the TRIMMER+ guarantees a millimetric and soft adjustment both in recovery and in release of the rope.

Equipped with an asymmetric Quick Link for a precise connection to the harness, with the minimum encumbrance.

Rope length 130 cm, suitable for all situations that require the connection to helicopter anchor points.

Bag dedicated both to the housing of the unused system and to containing the piece of rope that exceeds, without interfering with other equipment. The bag is equipped with a self-locking double-slider zip that allows the use on both sides of the harness. In addition, the bag fastening system, realised with a double loop with Velcro, allows positioning on harnesses with different belt heights.

Kit composed of:

- Trimmer+
- 130 cm length rope with sewed terminals and double gate connector mod. Tango
- Quick Link Asymmetric
- Dedicated bag
